

## TRANSPORTATION SOLUTIONS FOR THE FRACKING INDUSTRY

**Hydraulic fracturing – fracking – to harvest natural gas and petroleum reserves from shale is a booming business. According to a report by IHS Global Insight published in December 2011, fracking is forecast to contribute \$118 billion toward U.S. economic growth over the next four years. But as industry growth soars, so do the logistical challenges of doing business. Fortunately, ChemLogix offers cost-effective solutions for overcoming these challenges which improve supply chain visibility, create efficiencies and benefit your bottom line.**

Around the world, manufacturers, constructors, distributors and suppliers to the fracking industry depend on our best-in-breed technology and industry expertise to streamline the process of moving their materials from Point A to Point B.

### **ChemLogix' industry clout delivers results in four key ways:**

- **Intermodal** – ChemLogix covers every terrain, regardless of load size or destination, and selects only carriers who meet our exacting performance, safety and reliability standards
- **Consulting** – ChemLogix' background, expertise and proven track record of world-class logistics performance applies industry best practices to achieve your objectives
- **Transportation Brokerage Services** – ChemLogix' unrivaled network of industry relationships affords access to preferential rates
- **Rail Fleet Management** – At every point in the supply chain, from build, to track and trace, to maintenance schedules, ChemLogix' robust systems keep your fleet moving

ChemLogix brings significant value to companies working in the fracking industry. Whether your need involves full out-source capability, a system to increase visibility, a method for reducing transportation expenses, or answers to a logistical obstacle, we are your comprehensive resource for transportation solutions.

*"America's ability to harvest these energy sources will change our lives over the next 20 years. ChemLogix's broad range of experience in providing comprehensive logistics solutions to the energy industry can be a huge competitive advantage to companies seeking success in this rapidly expanding business segment".*

– Jim Suber, Sales Director

### **Transparency and Access at Every Gateway**

Regardless of shipment size, frequency, end destination or product type, ChemLogix has the answer:

**Global** – ChemLogix designed a transportation plan for a US importer working with a Chinese manufacturer of HCL to ship product over international waters into the US at rates competitive with domestic HCL.

**Intermodal** – ChemLogix facilitated the cost-competitive shipment of high volumes of a synthetic acid used in fracking from an East Coast US supplier to the western US and Canada for the product manufacturer

**Rail Fleet Management** – ChemLogix developed a completely transparent tracking, load monitoring, and rail yard management plan to allow a leading manufacturer of fracking sand to optimize its 4200-car rail fleet and become more competitive

### **About ChemLogix**

ChemLogix, LLC is an international provider of comprehensive logistics management and technology services that together with its supply chain consulting resources enable its clients to improve performance and drive economic value. ChemLogix is committed to solving our customers' logistics challenges through proven expertise, best-of-breed technology and a high-touch, service-oriented approach to deliver value that is both measurable and sustainable.
