

July 3, 2020:

CLX Logistics continues to monitor the impacts of the Covid-19 virus. As a company, we are focused on the safety of our employees and ensuring our customers are well supported through this time. We remain open for business and are operating under our business continuity plan. During this time, two-way communication is key. Please do not hesitate to reach out to us.

Below is a recap of key items impacting transportation today. It is a compilation of information from our team, carrier partners, customers, and industry sources.

Regulatory / Governmental Updates:

- [FMCSA](#) information and resources website contains the latest updates to the Covid-19 outbreak.
- As of [June 15](#) the extension for HOS relief will be limited to medical supplies related to testing, diagnosis, and treatment of Covid-19; livestock/livestock feed; and supplies necessary for community safety, sanitization, and prevention of community spread. The extension runs through July 14, 2020.
- FMCSA will [extend the waiver](#) for drivers with expiring CDL's, learner's permits or medical cards through September 30 due to the pandemic.
- **Operation Safe Driver week** will be held July [12-18](#). Operation Safe Driver focuses on both commercial and passenger vehicles. Shippers should anticipate reduced capacity availability during that week.

Closures and Travel Restrictions:

- The Cybersecurity and Infrastructure Security Agency (CISA) and Idaho National Laboratory (INL) have developed a website for truckers and other transportation professionals to understand the various restrictions found throughout the country. The Commercial Routing Assistance website can be accessed via [this link](#).
- The stay at home orders have expired across the country. The table of closures has been updated with the expiration dates for each state that implemented some form of a stay at home order. We have left the table active for now, due to the potential second wave as cases are spiking throughout the country. We will continue to monitor status in case states begin a second round of "stay at home" quarantine restrictions. As of now, several states have reinstated restrictions on things such as restaurants, bars, gyms but we are not aware of any stay at home restrictions being reinstated.
- A worldwide list of restrictions from the [International Road Transport Union](#) can be found [here](#).

Thank a trucker / transportation professional!

- During the outbreak of the Covid-19 virus, America's truckers have continued to supply the medicines, medical equipment, food, fuel, and other critical goods that we all depend upon each day.
- CLX would like to recognize and provide a small token of thanks those individuals who have remained out on the 'frontlines' performing these critical tasks while most non-essential activities have been stopped as America shelters in place.
- Please send any nominations for someone in the trucking industry (drivers, terminal employees, or dispatchers) that has provided exception service during this time to ICT@clxlogistics.com

Having Capacity Issues?

CLX Brokerage Services can help alleviate some of the capacity issues you may be experiencing with your pool of carriers.

Market Updates

Bulk, LTL & Truckload (Van/Reefer/Flatbed):

- Produce season is in full swing, and the July 4th holiday has further stretched capacity this week. The previously mentioned Operation Safe Driver will also impact capacity the week after next. The areas of high demand continue to stretch from the Houston, TX area across the gulf coast to New Orleans. A stretch from NE Texas/Dallas area through Arkansas, across Tennessee and into the western Carolinas, and Atlanta towards the Savannah Georgia areas are also running at high demand levels over the past week. There are capacity challenges in Southern California, as well as central Illinois to southwestern/central Ohio.

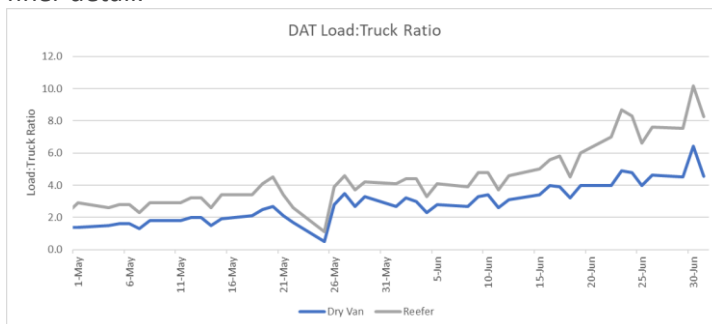

Trend info for Dry Van/Reefer/Flatbed:

- Spot market activity increased 16.2% overall last week in comparison to the prior week, per DAT.
- Van shipment load to truck ratio increased by 21.1% last week.
- Reefer shipment load to truck ratio increased by 37.6% last week.
- Flatbed shipment load to truck ratio increased by 18.3% last week.
- The table below is the latest load to truck ratio from DAT (US shipments).

Source: DAT Solutions, LLC.

- Same table as above but removed the flatbed info to show van/reefer in finer detail.

Market Tender Position → Six-Week recap:

- The six-week trend capture of tender acceptance as noted by the CLX carrier network for sequential tenders is below.
- Green dots/line represents the primary carrier, blue represents the backup carrier, red represents other alternate carrier options.
- Capacity continues to tighten as noted earlier. The primary carrier acceptance trend displayed on the final two graphs has declined noticeably as we approach the holiday weekend.
